Professional Summary

Passionate and creative Game Developer with strong experience in Unity, C#, and game programming principles. Skilled in designing gameplay mechanics, AI behaviors, physics systems, and multiplayer features. Experienced in developing 2D and 3D games for desktop and mobile platforms. Strong problem-solving skills with a passion for creating engaging and optimized gaming experiences.

Technical Skills

Programming Languages

- C#
- C++
- Python
- Java
- JavaScript

Game Development

- Unity Engine
- Unreal Engine 5
- Game Physics
- Gameplay Programming
- Animation Systems
- AI Programming
- Multiplayer Networking
- Level Design
- Game Optimization
- UI Development

Graphics & Design

- Blender

- Adobe Photoshop
- Substance Painter
- Shader Graph
- Visual Effects (VFX)

Tools & Technologies

- Git
- GitHub
- Visual Studio
- Rider
- Firebase
- Photon Unity Networking (PUN)
- Addressables
- JSON
- REST APIs

Concepts

- Object-Oriented Programming
 - Design Patterns
 - Data Structures & Algorithms
 - Software Engineering
 - Agile Development
-

Education

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)

Tribhuvan University

Expected Graduation: 2026

Relevant Coursework:

- Computer Graphics
 - Artificial Intelligence
 - Data Structures & Algorithms
 - Software Engineering
 - Operating Systems
 - Computer Networks
-

Projects

Multiplayer Battle Arena

Technologies: Unity, C#, Photon PUN

- Developed a real-time multiplayer arena game.
 - Implemented matchmaking and synchronized player movement.
 - Built health, inventory, and combat systems.
 - Optimized network traffic to improve gameplay performance.
 - Integrated player authentication and leaderboard system.
-

3D Adventure Game

Technologies: Unity, Blender, C#

- Designed interactive gameplay mechanics.
 - Developed enemy AI using finite state machines.
 - Created inventory, quest, and save/load systems.
 - Built responsive UI menus and settings panels.
 - Optimized rendering and reduced memory usage.
-

Endless Runner Mobile Game

Technologies: Unity, Firebase

- Created procedural obstacle generation.
 - Implemented scoring and achievement systems.
 - Added rewarded ads and analytics.
 - Published Android build for testing.
 - Optimized game performance for low-end devices.
-

Internship

Game Development Intern

XYZ Game Studio

Jan 2026 – Apr 2026

Responsibilities:

- Implemented gameplay features using Unity and C#.
- Fixed gameplay bugs and performance issues.
- Collaborated with artists and designers.
- Participated in Agile sprint planning.
- Assisted in QA testing and debugging.

Experience

Freelance Unity Developer

- Developed casual and educational games for clients.
- Created reusable gameplay systems.
- Improved game performance using Unity Profiler.
- Integrated third-party SDKs including Firebase and Google Play Games.

Certifications

- Unity Certified Associate
- C# Programming
- Unreal Engine Fundamentals
- Game Design Fundamentals
- Git & GitHub Essentials

Soft Skills

- Problem Solving
- Team Collaboration
- Creativity
- Communication
- Analytical Thinking
- Time Management
- Adaptability

Languages

- English
- Nepali
- Hindi

Achievements

- Developed 10+ game prototypes using Unity.
 - Participated in multiple game jams.
 - Built and published mobile games on Android.
 - Implemented AI systems and multiplayer functionality for academic and personal projects.
-

Interests

- Indie Game Development
 - Artificial Intelligence in Games
 - Virtual Reality (VR)
 - Augmented Reality (AR)
 - Competitive Gaming
 - Game Design
-
